(54) Title: **CHEST OF CINERARY URNS**

(57) Abstract: A chest of cinerary urns which has a simple structure capable of allowing convenient placing of cinerary urns therein, while minimizing decay and degradation of cremated remains stored in the placed cinerary urns. The chest of cinerary urns includes a chest body having a plurality of urn receiving spaces, a plurality of cover plates detachably attached to the chest body to cover the urn receiving spaces, seal members each interposed between a portion of the chest body around the associated urn receiving space and the associated cover plate, hollow inlet members each protruded from an associated rear wall portion of the chest body, each of the inlet members communicating with the associated urn receiving space, valve mounting members each coupled to the associated inlet member, and injection valves each fitted in the associated valve mounting member, and centrally provided with an injection hole to allow gas to be injected through the injection hole into the associated inlet member.
